Name Chapter 1 - Studying Adult Development and Aging

Description

Instructions

[Modify](#)

[◀ Add Question Here](#)

Question 1 **Multiple Choice**

[Modify](#)

[Remove](#)

Question The field of study that examines the aging process is

Answer

- ☐ psychology.
- ☒ gerontology.
- ☐ psychogerontology.
- ☐ gerontocracy.

[◀ Add Question Here](#)

Question 2 **Multiple Choice**

[Modify](#)

[Remove](#)

Question Ageism is

Answer ☒ a form of discrimination against older adults simply due to their age.
☐ a form of negative stereotype against older adults because of their age.
☐ a form of prejudice against older adults because of their race.
☐ a form of myth about older adults that is highly positive.

[◀ Add Question Here](#)

Question 3 **Multiple Choice**

[Modify](#)

[Remove](#)

Question A manager of a large department store tries to avoid hiring people over the age of 65 because he believes they cannot handle the strain and take a very long time to learn the job. The belief of the manager is known as

Answer

- ☐ contextualism.
- ☐ socialization.
- ☒ ageism.
- ☐ dysthymia.

[◀ Add Question Here](#)

Question 4 **Multiple Choice**

[Modify](#)

[Remove](#)

Question The life-span perspective emphasizes an approach that is

Answer

- ☐ unidimensional.
- ☐ discipline specific.
- ☒ interdisciplinary.
- ☐ unidisciplinary.

[◀ Add Question Here](#)**Question 5 Multiple Choice**

Modify

Remove

Question A key premise of the life-span perspective is that

- Answer**
- biological changes are the most important.
 - events that happen in old age are more important than earlier experiences.
 - social changes are the most important.
 - ✓ aging is a life long process that begins at conception and ends at death.

[◀ Add Question Here](#)**Question 6 Multiple Choice**

Modify

Remove

Question Multidirectionality refers to

- Answer**
- ✓ development and aging involving both decline and growth.
 - the ability to change and improve abilities over time and with development.
 - the fact that each of us is affected by a variety of factors both positive and negative.
 - our differing cultural backgrounds.

[◀ Add Question Here](#)**Question 7 Multiple Choice**

Modify

Remove

Question Plasticity refers to

- Answer**
- development and aging involving both decline and growth.
 - ✓ the ability to change and improve abilities over time and with development.
 - the fact that each of us is affected by a variety of factors, both positive and negative.
 - our differing cultural backgrounds.

[◀ Add Question Here](#)**Question 8 Multiple Choice**

Modify

Remove

Question Multiple causation refers to

- Answer**
- development and aging involving both decline and growth.
 - the ability to change and improve abilities over time and with development.
 - ✓ the fact that each of us is affected by a variety of factors, both positive and negative.
 - our differing cultural backgrounds.

[◀ Add Question Here](#)**Question 9 Multiple Choice**

Modify

Remove

Question Which of the following statements is **true** of the population over the age of 65?

- Answer**
- ✓ The fastest growing segment of the entire U.S. population is the over-85 group.
 - There are more men than women in all segments of elderly population.
 - There are fewer baby boomers over the age of 65.
 - The average age of this group is getting lower.

[◀ Add Question Here](#)

Question 10 Multiple Choice

Modify

Remove

Question Relative to European Americans, the number of older ethnic Americans is

Answer decreasing.

✓ increasing.

similar.

decreasing among women, while increasing among men.

◀ [Add Question Here](#)

Question 11 Multiple Choice

Modify

Remove

Question Four forces shape development. Which one of the following is **not** a developmental force?

Answer life-cycle

psychological

biological

✓ histological

◀ [Add Question Here](#)

Question 12 Multiple Choice

Modify

Remove

Question All genetic and health-related factors that affect development are known as

Answer life-cycle forces.

psychological forces.

✓ biological forces.

histological forces.

◀ [Add Question Here](#)

Question 13 Multiple Choice

Modify

Remove

Question Facial wrinkling is an example of which force of development?

Answer life-cycle forces

psychological forces

✓ biological forces

histological forces

◀ [Add Question Here](#)

Question 14 Multiple Choice

Modify

Remove

Question Characteristics that make us individuals, such as one's personality, are the result of

Answer life-cycle forces.

✓ psychological forces.

biological forces.

histological forces.

◀ [Add Question Here](#)

Question 15 Multiple Choice

Modify

Remove

Question Normative age-graded influences are events that

- Answer**
- are unique to each person.
 - occur at a specific age for each person.
 - ✓ generally occur around the same age for most people.
 - generally occur during a specific time period for most people.

◀ [Add Question Here](#)

Question 16 **Multiple Choice**

Modify

Remove

Question Which of the following is an example of normative age-graded influences on development?

- Answer**
- ✓ learning to drive a car
 - being a member of the Depression generation
 - winning the lottery
 - contracting AIDS

◀ [Add Question Here](#)

Question 17 **Multiple Choice**

Modify

Remove

Question The death of a spouse at age 80 is an example of a

- Answer**
- ✓ normative age-graded event.
 - normative history-graded event.
 - normative individual-graded event.
 - nonnormative event.

◀ [Add Question Here](#)

Question 18 **Multiple Choice**

Modify

Remove

Question Normative history-graded influences are events that

- Answer**
- are unique to each person.
 - occur at a specific age for each person.
 - generally occur around the same age for most people.
 - ✓ generally occur during a specific time period for most people.

◀ [Add Question Here](#)

Question 19 **Multiple Choice**

Modify

Remove

Question The “sexual revolution” in the 1960s is an example of a

- Answer**
- normative age-graded event.
 - ✓ normative history-graded event.
 - normative individual-graded event.
 - nonnormative event.

◀ [Add Question Here](#)

Question 20 **Multiple Choice**

Modify

Remove

Question The death of a spouse at age 25 is an example of a

- Answer**
- normative age-graded event.
 - normative history-graded event.
 - normative individual-graded event.
 - ✓ nonnormative event.

◀ [Add Question Here](#)

Question 21 **Multiple Choice**

Modify

Remove

Question Which of the following is a nonnormative influence on behavior?

- Answer**
- when one's first marriage occurs
 - being a "baby boomer"
 - having a child
 - ✓ winning the lottery

◀ [Add Question Here](#)

Question 22 **Multiple Choice**

Modify

Remove

Question is defined as shared values, norms, beliefs, and ways of living.

- Answer**
- Socioculutral forces
 - Ethnicity
 - ✓ Culture
 - Socialization

◀ [Add Question Here](#)

Question 23 **Multiple Choice**

Modify

Remove

Question Normal, disease-free movement across adulthood is termed

- Answer**
- ✓ primary aging.
 - secondary aging.
 - tertiary aging.
 - holistic aging.

◀ [Add Question Here](#)

Question 24 **Multiple Choice**

Modify

Remove

Question Developmental change in adulthood that is related to disease is termed

- Answer**
- primary aging.
 - ✓ secondary aging.
 - tertiary aging.
 - holistic aging.

◀ [Add Question Here](#)

Question 25 **Multiple Choice**

Modify

Remove

Question Loss of memory from Alzheimer's disease is a good example of

- Answer**
- primary aging.
 - ✓ secondary aging.
 - tertiary aging.

holistic aging.

◀ [Add Question Here](#)

Question 26 **Multiple Choice**

Modify

Remove

Question involves a rapid loss that occurs just before death.

Answer

Primary aging

Secondary aging

✓ Tertiary aging

Holistic aging

◀ [Add Question Here](#)

Question 27 **Multiple Choice**

Modify

Remove

Question Bill experienced a rapid loss of his ability to function shortly before his death at age 79. Bill's developmental change is an example of

Answer

primary aging.

secondary aging.

✓ tertiary aging.

holistic aging.

◀ [Add Question Here](#)

Question 28 **Multiple Choice**

Modify

Remove

Question Which of the following is the poorest definition of age from a developmental perspective?

Answer

biological age

✓ chronological age

sociocultural age

psychological age

◀ [Add Question Here](#)

Question 29 **Multiple Choice**

Modify

Remove

Question Mary is 60 years old, drives a Corvette, and has a teenage daughter. She would be considered to have a young

Answer

biological age.

chronological age.

✓ sociocultural age.

psychological age.

◀ [Add Question Here](#)

Question 30 **Multiple Choice**

Modify

Remove

Question The index of age that represents a person's intellectual, memory, or learning ability function is called

Answer

biological age.

chronological age.

sociocultural age.

✓ psychological age.

◀ [Add Question Here](#)

Question 31 **Multiple Choice**

Modify

Remove

Question In terms of psychological age, which of the following people is the **youngest**?

Answer

- Michelle, a college graduate at age 17
- Anne, a secretary at age 25
- Sarah, a school teacher at age 55
- ✓ Cathy, a college sophomore at age 48

◀ [Add Question Here](#)

Question 32 **Multiple Choice**

Modify

Remove

Question How much of one's development is influenced by heredity and how much is influenced by experience. This is known as the

Answer

- ✓ nature-nurture controversy.
- continuity-discontinuity controversy.
- stability-change controversy.
- universal versus context specific controversy.

◀ [Add Question Here](#)

Question 33 **Multiple Choice**

Modify

Remove

Question "You are a product of your environment" is an example of a position on which of the following controversies?

Answer

- continuity-discontinuity
- stability-change
- longitudinal-sequential
- ✓ nature-nurture

◀ [Add Question Here](#)

Question 34 **Multiple Choice**

Modify

Remove

Question The belief in inevitable decline in intelligence as people grow older is representative of a

Answer

- ✓ nature position.
- nurture position.
- qualitative change position.
- quantitative change position.

◀ [Add Question Here](#)

Question 35 **Multiple Choice**

Modify

Remove

Question The question, "are you the same today as you were as a child?" represents the _____ controversy.

Answer

- nature-nurture
- ✓ stability-change
- continuity-discontinuity

formist-contextualist

[◀ Add Question Here](#)

Question 36 Multiple Choice

Modify

Remove

Question A discontinuity view involves the _____ of a characteristic a person has.**Answer**

- amount
- ✓ kind
- plasticity
- stability

[◀ Add Question Here](#)

Question 37 Multiple Choice

Modify

Remove

Question A continuity view involves the _____ of a characteristic a person has.**Answer**

- ✓ amount
- kind
- plasticity
- stability

[◀ Add Question Here](#)

Question 38 Multiple Choice

Modify

Remove

Question The question of whether we all develop the same way or are there multiple pathways to development refers to which controversy?**Answer**

- nature-nurture
- continuity-discontinuity
- stability-change
- ✓ universal versus context-specific

[◀ Add Question Here](#)

Question 39 Multiple Choice

Modify

Remove

Question Understanding the cultural and ethnic differences between African American and European American family structures relies on which controversy?**Answer**

- nature-nurture
- continuity-discontinuity
- stability-change
- ✓ universal versus context-specific

[◀ Add Question Here](#)

Question 40 Multiple Choice

Modify

Remove

Question The degree to which a questionnaire measures a construct consistently is its**Answer**

- representativeness.
- utility index.
- validity.
- ✓ reliability.

[◀ Add Question Here](#)

Question 41 Multiple Choice

Modify

Remove

Question The degree to which a questionnaire measures what it is supposed to measure is its

Answer

- representativeness.
- utility index.
- ✓ validity.
- reliability.

 [Add Question Here](#)

Question 42 Multiple Choice

Modify

Remove

Question Structured observations differ from naturalistic observations in that they

Answer

- manipulate variables to see cause and effect relationships.
- ✓ create a situation that is likely to elicit the behavior of choice.
- sample behaviors of interest in everyday situations.
- systematic observations are more valid.

 [Add Question Here](#)

Question 43 Multiple Choice

Modify

Remove

Question Questionnaires and interviews are examples of _____ techniques.

Answer

- observational
- correlational
- sampling
- ✓ self-report

 [Add Question Here](#)

Question 44 Multiple Choice

Modify

Remove

Question In a study on memory in adults, if the spring semester class of adulthood and aging students was tested for aging bias among college students, this class would be a

Answer

- population of people.
- ✓ sample of people.
- independent variable.
- dependent variable.

 [Add Question Here](#)

Question 45 Multiple Choice

Modify

Remove

Question Most studies in adult development and aging research have been conducted on middle-class European Americans. This group of people represent the _____ of the study.

Answer

- population
- ✓ sample
- independent variable
- index variable

 [Add Question Here](#)

Question 46 Multiple Choice

Modify

Remove

Question Manipulation is a fundamental component of

Answer

- correlational techniques.
- naturalistic inquiry.
- observation.
- ✓ experimentation.

◀ [Add Question Here](#)

Modify

Remove

Question 47 **Multiple Choice**

Question Which variables are manipulated by the researcher in an experiment?

Answer

- dependent variables
- ✓ independent variables
- co-dependent variables
- latent variable

◀ [Add Question Here](#)

Modify

Remove

Question 48 **Multiple Choice**

Question The observed behavior of interest in an experiment is termed the

Answer

- dependent variable.
- ✓ independent variable.
- co-dependent variable.
- latent variable.

◀ [Add Question Here](#)

Modify

Remove

Question 49 **Multiple Choice**

Question Which of the following cannot be an independent variable?

Answer

- drug dosage
- anxiety
- amount of sleep
- ✓ age

◀ [Add Question Here](#)

Modify

Remove

Question 50 **Multiple Choice**

Question The reason that most research on development is not truly experimental is due to the fact that

Answer

- age cannot be measured accurately in most people.
- most statistics cannot handle age as a variable.
- ✓ age cannot be manipulated therefore it cannot be an independent variable.
- it is hard to collect large enough samples to represent different age groups.

◀ [Add Question Here](#)

Modify

Remove

Question 51 **Multiple Choice**

Question A study that focuses on the description of the relationship between cognitive development and personality development is an example of

Answer

- a self-report study.
- an observational study.
- an experiment.
- ✓ a correlational study.

◀ [Add Question Here](#)

Question 52 **Multiple Choice**

Modify

Remove

Question Which of the following issues **cannot** be examined in a correlational study?

Answer

- ✓ causation
- description
- strength of relationships
- presence of relationships

◀ [Add Question Here](#)

Question 53 **Multiple Choice**

Modify

Remove

Question Even if age is positively correlated with speed of processing, we cannot conclude that age “caused” this increase because

Answer

- response speed is not usually affected by age.
- age normally causes a decrease in speed.
- ✓ only experimental studies can demonstrate cause and effect relationships.
- only correlational studies can demonstrate cause and effect relationships.

◀ [Add Question Here](#)

Question 54 **Multiple Choice**

Modify

Remove

Question Correlational studies

Answer

- are effective with variables that can't be manipulated.
- provide important information about the strength of relationships between variables.
- can't provide information concerning causation.
- ✓ all of these.

◀ [Add Question Here](#)

Question 55 **Multiple Choice**

Modify

Remove

Question A girl beginning puberty around 12 years old is an example of a(n)

Answer

- ✓ age effect.
- time-of-measurement effect.
- practice effect.
- cohort effect.

◀ [Add Question Here](#)

Question 56 **Multiple Choice**

Modify

Remove

Question In research the term used to refer to a group of people who experienced the same event or were born during the same time period is called a(n)

Answer

- age effect.
- time-of-measurement effect.
- practice effect.
- ✓ cohort effect.

◀ [Add Question Here](#)

Question 57 **Multiple Choice**

Modify
Remove

Question Living through World War II was an event experienced by a group of people. This is an example of a(n)

Answer

- age effect.
- time-of-measurement effect.
- practice effect.
- ✓ cohort effect.

◀ [Add Question Here](#)

Question 58 **Multiple Choice**

Modify
Remove

Question Testing peoples' fear of flying shortly following a major airplane crash might produce a(n)

Answer

- age effect.
- ✓ time-of-measurement effect.
- practice effect.
- cohort effect.

◀ [Add Question Here](#)

Question 59 **Multiple Choice**

Modify
Remove

Question Developmental researchers are interested in understanding

Answer

- how people change over time.
- age-related changes.
- age- related differences.
- ✓ all of these

◀ [Add Question Here](#)

Question 60 **Multiple Choice**

Modify
Remove

Question In a _____ design, groups of participants varying in age are studied at one point in time.

Answer

- ✓ cross-sectional
- longitudinal
- cross-sequential
- longitudinal-sequential

◀ [Add Question Here](#)

Question 61 **Multiple Choice**

Modify
Remove

Question Dr. Geri Atrics wants to survey people 21 and 90 years old to get their opinions concerning financial aid to college students. Which research design is Dr. Atrics most likely to use?

Answer

- ✓ cross-sectional
- longitudinal
- time-lag
- sequential

[◀ Add Question Here](#)**Question 62 Multiple Choice**[Modify](#)[Remove](#)

Question Dr. Gerin Tology wants to survey young adults, middle-aged adults, and older adults on their physical health. Which research design is Dr. Tology most likely to use?

Answer

- ✓ cross-sectional
- longitudinal
- time-lag
- sequential

[◀ Add Question Here](#)**Question 63 Multiple Choice**[Modify](#)[Remove](#)

Question Which of the following is **not** a characteristic of cross-sectional research?

Answer

- multiple age groups
- multiple cohorts
- ✓ repeated observations
- single time-of-measurement

[◀ Add Question Here](#)**Question 64 Multiple Choice**[Modify](#)[Remove](#)

Question Which two effects are confounded in cross-sectional research?

Answer

- ✓ age and cohort
- age and time-of-measurement
- cohort and time-of-measurement
- cohort and practice

[◀ Add Question Here](#)**Question 65 Multiple Choice**[Modify](#)[Remove](#)

Question You just saw a story on the news that reported older women's IQ drops dramatically after the age of 60. This result was concluded from comparisons of women born in 1910-1930 and women born between 1960-1980. Based on this information, the criticism you would be likely to make would be that

Answer

- this is not a valid result because men were not included.
- longitudinal research doesn't work well when looking at IQ data.
- ✓ cohort effects are likely to account for the differences.
- whoever conducted this study doesn't like older women.

[◀ Add Question Here](#)**Question 66 Multiple Choice**[Modify](#)[Remove](#)

Question A very commonly used design in adult development and aging research is the extreme age design ("young" v. "old"). Which of the following is a limitation of this type of study?

- Answer**
- ☐ The samples are not representative and may not generalize.
 - ☐ The measures may not mean the same thing across age groups and may not be valid.
 - ☐ Age is not treated as a continuous variable.
 - ☒ All of these.

 [Add Question Here](#)

Question 67 **Multiple Choice**

Modify

Remove

Question In a _____ design, one group of participants is studied repeatedly over a period of time.

- Answer**
- ☐ cross-sectional
 - ☒ longitudinal
 - ☐ cross-sequential
 - ☐ longitudinal-sequential

 [Add Question Here](#)

Question 68 **Multiple Choice**

Modify

Remove

Question Dr. Dee Vellop wants to know what will happen to the 1990 class of gerontology graduates during the decade following their graduation. Which research design will Dr. Vellop most likely use?

- Answer**
- ☐ cross-sectional
 - ☒ longitudinal
 - ☐ time-lag
 - ☐ sequential

 [Add Question Here](#)

Question 69 **Multiple Choice**

Modify

Remove

Question A researcher decides to investigate whether there are any changes in people's IQ scores from early adulthood through late adulthood. The researcher (and others) begins with a sample of 21-year-olds and plans to follow this group until they are 80 years old. The type of research design she is planning to employ is called

- Answer**
- ☐ cross-sectional.
 - ☒ longitudinal.
 - ☐ time-lag.
 - ☐ sequential.

 [Add Question Here](#)

Question 70 **Multiple Choice**

Modify

Remove

Question Age changes are studied most effectively using a _____ design.

- Answer**
- ☐ cross-sectional
 - ☒ longitudinal
 - ☐ time-lag
 - ☐ sequential

[◀ Add Question Here](#)**Question 71 Multiple Choice**[Modify](#)[Remove](#)

Question Which two effects are confounded in longitudinal research?

Answer

- age and cohort
- ✓ age and time-of-measurement
- cohort and time-of-measurement
- cohort and practice

[◀ Add Question Here](#)**Question 72 Multiple Choice**[Modify](#)[Remove](#)

Question Practice effects are a major problem with ____ .

Answer

- cross-sectional designs
- ✓ longitudinal designs
- time-lag designs
- sequential designs

[◀ Add Question Here](#)**Question 73 Multiple Choice**[Modify](#)[Remove](#)

Question If participants at the end of a longitudinal study tend to be those who were initially higher on some variable, we have a case of

Answer

- negative selective survival.
- ✓ positive selective survival.
- elective selective survival.
- equally selective survival.

[◀ Add Question Here](#)**Question 74 Multiple Choice**[Modify](#)[Remove](#)

Question If the surviving participants in the last wave of testing in a longitudinal study on health and aging were those who initially had the lowest blood pressures, then we have a case of

Answer

- ✓ negative selective survival.
- positive selective survival.
- elective selective survival.
- equally selective survival.

[◀ Add Question Here](#)**Question 75 Multiple Choice**[Modify](#)[Remove](#)

Question A ____ design combines two or more cross-sectional designs.

Answer

- ✓ cross-sequential
- longitudinal
- cross-sectional
- longitudinal sequential

[◀ Add Question Here](#)

Question 76

Multiple Choice

Modify

Remove

Question Dr. Gerin Tology wants to survey several cohorts of people 21 years old to get their opinions concerning financial aid to college students (e.g., the class of 1995, 2000, and 2005). Which research design is Dr. Tology most likely to use?

Answer

- ☒ cross-sequential
- ☐ longitudinal-sequential
- ☐ time-lag
- ☐ cross-sectional

 [Add Question Here](#)

Question 77

Multiple Choice

Modify

Remove

Question Dr. Dee Vellop wants to know what will happen to the 1990, 1991, and 1992 classes of gerontology graduates during the decade following their graduation. Which research design will Dr. Vellop most likely use?

Answer

- ☐ cross-sequential
- ☐ longitudinal
- ☐ time-lag
- ☒ longitudinal-sequential

 [Add Question Here](#)

Question 78

Multiple Choice

Modify

Remove

Question An example of a longitudinal sequential design would be

- Answer** ☒ measuring two cohorts of people over time.
- ☐ measuring several cross-sections of people once.
 - ☐ measuring multiple groups of same-aged people.
 - ☐ measuring one group of people over time.

 [Add Question Here](#)

Question 79

Multiple Choice

Modify

Remove

Question In this type of sequential design, cohort and time of measurement effects are examined.

Answer

- ☐ cross-sequential
- ☐ time-sequential
- ☐ time-lag sequential
- ☒ longitudinal sequential

 [Add Question Here](#)

Question 80

Multiple Choice

Modify

Remove

Question The procedures used in research to ensure the participants are treated fairly are known as

Answer

- ☒ ethical principles.
- ☐ psychological principles.
- ☐ psychometrics.
- ☐ debriefing.

[◀ Add Question Here](#)**Question 81 Essay**[Modify](#)[Remove](#)

Question Describe the correspondence between ageism and stereotypes of aging. Make sure that your response includes a definition and an example of each term.

Answer Answer not provided

[◀ Add Question Here](#)**Question 82 Essay**[Modify](#)[Remove](#)

Question What are the four characteristics of Baltes' Life-span perspective?

Answer Answer not provided

[◀ Add Question Here](#)**Question 83 Essay**[Modify](#)[Remove](#)

Question Describe why adult development and aging is often examined from a multidisciplinary perspective.

Answer Answer not provided

[◀ Add Question Here](#)**Question 84 Essay**[Modify](#)[Remove](#)

Question How will changes in the age distribution of the United States population affect society? Please provide examples.

Answer Answer not provided

[◀ Add Question Here](#)**Question 85 Essay**[Modify](#)[Remove](#)

Question Discuss how the interaction of biological, psychological, and sociocultural forces through life-cycle forces shape a person's development.

Answer Answer not provided

[◀ Add Question Here](#)**Question 86 Essay**[Modify](#)[Remove](#)

Question Define and provide an example of a normative age-graded event, a normative history-graded event, and a nonnormative event.

Answer Answer not provided

[◀ Add Question Here](#)**Question 87 Essay**[Modify](#)[Remove](#)

Question What is the stability-change controversy? How does this relate to the continuity-discontinuity controversy?

Answer Answer not provided

[◀ Add Question Here](#)**Question 88 Essay**[Modify](#)[Remove](#)

Question What is the universal versus context-specific controversy and how does it relate to sociocultural forces?

Answer Answer not provided

◀ [Add Question Here](#)

Question 89 **Essay**
